Aging US widow, Pinery found dead in suicide pact

MANILA, Philippines — A 70-year-old widow of a US Marine was found dead in a suicide pact with her 10-year-old son. The woman was found in a room in a hotel in Manila, where she was staying with her son. The police are investigating the case.

Prosecution exasperated by delays in Erap trial

By Michael J. Murray

MANILA, Philippines — The prosecution is growing impatient with the delays in the trial of Erap, a former member of the New People's Army (NPA). The trial has been postponed several times due to various reasons, including the need for more evidence and the unavailability of key witnesses.

Promotion of two 'Garci' generals hit

MANILA (Inquirer) — The promotion of two top military officers to the rank of lieutenant general has been delayed by the Department of Defense (DOD) because of the ongoing investigation into the alleged involvement of the officers in the 1998 election fraud.

The officers, who were promoted to the rank of lieutenant general in 1998, are now being investigated by the DOD for their alleged involvement in the 1998 election fraud. The investigation is still ongoing, and the results are expected to be released in the near future.

Summary: The authors argue that the current literature has paid insufficient attention to the role of social factors in the development of the self. They propose a model of the self that is based on the idea of the self as a social construct.

It's important to understand that the "average" is not a single number. It's a range of numbers. The "average" is the range of numbers that are most likely to occur. It's the range of numbers that are most likely to be the "average" of a group of numbers. It's the range of numbers that are most likely to be the "average" of a group of numbers.

Major Findings

Recepting was unaffected from the increased pressure but heat-conductivity *was* a problem. For the industry proper water will be the project's main challenge. Despite the oil industry's efforts to be a little cleaner in recent years, it's not a good reputation.

But because language is a living thing, we need to be flexible and adapt to the changing world. It's not just about the words we use, but also about the way we use them. We need to be able to communicate effectively in a global context, and that means being able to understand and use different languages and cultures. We need to be able to work together, to share ideas, and to learn from each other. We need to be able to adapt to change, to embrace diversity, and to create a better world for ourselves and for future generations.

I have no idea what a "cognitive map" has to do with the cognitive-mapping tool.

It is important to note that the results of this study are based on a cross-sectional design. Therefore, the causal relationship between the variables cannot be definitively established. Future research should consider longitudinal designs to explore the temporal dynamics of these relationships.

There is a very real danger that the current efforts to reform the courts will be a mere "cosmetic surgery" that will not address the underlying problems of the judiciary. The current efforts to reform the courts are a necessary first step, but they are not enough. We need a more comprehensive approach that addresses the underlying problems of the judiciary, such as the lack of transparency and accountability, the lack of independence, and the lack of public confidence.

During the 1990s, many of the most important and best-selling books were written by women. The number of books by women in the top 100 list grew from 15 in 1990 to 25 in 1999. The number of books by women in the top 100 list grew from 15 in 1990 to 25 in 1999.

is a well-known fact that the most common cause of death in the United States is heart disease. The most common cause of heart disease is atherosclerosis, a condition in which the arteries become narrowed and hardened by a buildup of fatty material, called plaque, in the inner wall of the artery. The most common cause of atherosclerosis is high blood pressure. High blood pressure is a condition in which the force of the blood against the artery walls is too high. This can damage the arteries and lead to heart disease. High blood pressure is often caused by a diet high in salt and fat, lack of exercise, and stress. It is important to keep your blood pressure under control to prevent heart disease. You can do this by eating a healthy diet, exercising regularly, and managing stress. If you have high blood pressure, your doctor will prescribe medication to help you control it. It is important to take your medication as directed and to have regular checkups with your doctor.

Ukraine parliament sacks gov't

By Associated Press
KIEV, Ukraine (AP) — Ukraine's parliament on Tuesday ousted the government of Prime Minister Viktor Yanukovich, a move that could lead to new elections and a change in leadership.

The parliament, known as the Verkh Rada, voted 323 to 10 to remove Yanukovich's cabinet. The move came after a series of protests in the capital, Kiev, over the government's handling of the economy and corruption.

Yanukovich, who has been in power since 2005, is a member of the opposition. He is a member of the opposition. He is a member of the opposition.

Peña saves Beermen as Daniels crumbles

By [Name]

MANILA (PDI) - The Beermen secured a 100-90 victory over the Alaska Aces in the first round of the PBA Commissioner's Cup.

The Beermen, coached by Tim Cone, dominated the game from start to finish. They led by as much as 30 points in the third quarter.

Alvin Patrimonio was the star for the Beermen, scoring 25 points and grabbing 10 rebounds. James Tanaka also contributed with 18 points.

The Aces, coached by Tim Lincecum, struggled throughout the game. They were out of sync and committed several turnovers.

The game was held at the Smart Araneta Coliseum in Manila.

3G FREQUENCY ASSIGNMENTS

Bayatel seeks reconsideration of NTC decision

By David S. Porter

Bayatel, a telecommunications company, has filed a petition with the National Telecommunications Commission (NTC) to reconsider its decision regarding the assignment of 3G frequencies. The company argues that the NTC's decision is flawed and seeks a more equitable distribution of the spectrum. Bayatel's petition highlights the technical and economic challenges posed by the current allocation and proposes alternative frequency bands for 3G use. The NTC has previously ruled on the matter, but Bayatel believes its interests are not being fully represented. The company's legal team is currently reviewing the NTC's decision and preparing for a potential appeal. The case is expected to be a significant test for the NTC's regulatory authority in the telecommunications sector.

BUSINESS

S. Korean firm bags \$178-M Petron deal

Growing market, rising prices seen prompting further expansion of petrochemical business

By Miguel S. Ho

MANILA, Jan. 12 (PNA) — The South Korean firm LG Chemical, which has been expanding its petrochemical business in the Philippines, has secured a \$178-million deal with Petron Corp. to supply the latter with ethylene and propylene.

The deal, which is the largest in the history of the two companies' relationship, was announced by LG Chemical's president, Lee Sang-ho, during a visit to Manila last week.

LG Chemical, which is a subsidiary of LG Group, is a leading petrochemical producer in South Korea. It has been expanding its business in the Philippines since 2005, when it entered into a joint venture with Petron to establish LG-Petron Petrochemicals Inc. (LGPP).

The deal is expected to boost LGPP's production capacity and strengthen its position as a leading petrochemical producer in the Philippines. LGPP is currently producing ethylene and propylene for various industries, including plastics, textiles, and chemicals.

The deal is also seen as a sign of growing demand for petrochemicals in the Philippines, as well as rising prices of these commodities in the global market.

Petron Corp. is a leading oil and gas company in the Philippines. It has been expanding its petrochemical business in recent years, and this deal is expected to further strengthen its position in the market.

The deal is also expected to create jobs and boost the local economy. LGPP is currently employing about 1,000 workers, and the deal is expected to create additional jobs in the future.

LG Chemical President Lee Sang-ho (right) and Petron Corp. President Ramon S. Alcala (left) during a meeting in Manila last week. The deal is expected to boost LGPP's production capacity and strengthen its position as a leading petrochemical producer in the Philippines.
